PIAGET MOVEMENTS

Les ateliers de L'EXTRA ORDINAIRE

In 1874, when he was just nineteen, Georges-Édouard Piaget set up his first workshop. In the family farmhouse, in the small village of La Côte-aux-Fées he devoted himself to creating high-precision movements – and laid the groundwork for Piaget's ever-growing reputation of excellence and craftsmanship.

In the late 1950s Piaget continued, with pioneering spirit, to design and manufacture the ultra-thin movements that would leave a lasting impression on watchmaking and become a signature of the Maison.

Just as ultra-thin movements are a Piaget signature, so is its distinguished style: a marriage of gold and vibrant colour, new shapes, precious gems, and dials made of hard stones. Carried on a wave of extraordinary creativity driven by Yves G. Piaget, the Maison has a passion for artistry that makes each creation a breath-taking work of art.

With offerings encompassing extravagant Haute Joaillerie, jewels in motion and exceptional watches, the Maison has continued to innovate. More than 140 years after its creation, Piaget remains one of the world's most prestigious watchmaker-jewellers.
